PRODUCT DESIGN PROJECTS

Creative Collab

2026

Product Designer — 0-to-1 collaboration platform for independent filmmakers and creators

Designed and built a 0-to-1 collaboration platform addressing the underserved "before-team" moment; used competitive research to define the MVP and develop an AI-assisted functional prototype.

Designed the two-sided experience across discovery, onboarding, Creative Identity, response-first interest, creator review, and project communication; created a reusable Figma system with semantic tokens, components, states, and accessibility considerations.

Vagus

2026

Product Designer — Context-aware travel decision product

Designed a context-aware travel decision product that turns location, time, weather, distance, and availability into lightweight recommendations for uncertain moments while traveling.

Developed a data-to-decision framework connecting contextual inputs, recommendation logic, user controls, feedback signals, and success metrics; translated the system into an AI-assisted interactive prototype.
